

SUMMARY

Data enthusiast with a strong background in SQL, Python, Power BI, and Excel. Skilled in data analysis, dashboard creation, and reporting. Recently completed courses in Prompt Engineering and Generative AI, showcasing adaptability to new tech. Quick learner with strong communication and a passion for turning data into insights.

EDUCATION

RAJALAKSHMI ENGINEERING COLLEGE CHENNAI

B.E.Computer Science Engineering
2021-2025 CGPA: 7.15

SMT.NARBADA DEVI J.AGARWAL VIVEKANANDA VIDYALAYA SR. SECONDARY SCHOOL

HSC
2021 Percentage: 82

SKILLS

- Programming skills - Python
- Database - MySQL, MongoDB
- Tools - Ms Word, Excel, Power BI, Jupyter Notebook, VS Code

CERTIFICATIONS

- **ChatGPT & Generative AI: Prompt Engineering**, Udeemy
- **Data Analysis in Power BI with ChatGPT and Microsoft Copilot**, Udeemy
- **Excel Essential Training**, LinkedIn Learning
- **Introduction to IOT**, NPTEL
- **Joy of computing using python**, NPTEL

INTERNSHIP

- **Deep learning Intern**
Vcodez, Chennai. (3 months)
- **DataBase Management System Intern**
NISC, Chennai. (1 week)

PROJECTS

SMART IRRIGATION SYSTEM -IOT

Developed a smart irrigation system that utilizes IOT sensors to monitor soil moisture levels and weather conditions, optimising water usage and enhancing agriculture efficiency. Successfully reduced water consumption by 40%. The blynk mobile app interface allows for real time monitoring and control

Hospital Management System -HTML CSS Python MySql

Designed and developed a role-based healthcare management system to streamline hospital operations. Implemented core modules for patient registration, doctor scheduling, appointment booking, electronic medical records, and billing. Enabled secure authentication for Admin, Doctor, and Patient roles. Integrated dynamic dashboards and invoice generation features. Built using Python, HTML, CSS, and PostgreSQL.

CELLS RESPONSIBLE FOR SKIN CANCER DEVELOPMENT -RESNET50,VGG19

Developed a deep learning-based skin cancer classifier using ResNet-50 and VGG19 on the HAM10000 dataset. Handled class imbalance with SMOTE and data augmentation. Built a user-friendly Python GUI (Tkinter) for real-time image input and instant predictions, making early detection accessible and efficient.

Sales Performance Dashboard using Power BI, Excel, and SQL

Designed and developed a business intelligence dashboard to monitor sales performance across regions and product categories. Utilized SQL to extract and clean data, Excel for exploratory data analysis, and Power BI to build interactive reports. Integrated DAX to create KPIs such as revenue and growth trends, helping stakeholders identify key insights and make informed business decisions.
