

SUMMARY

Web Developer & Regulatory Compliance Architect with expertise in end-to-end website creation, deployment, and medical device compliance (CDSCO). Skilled in SQL, Python, Power BI, and modern frameworks.

EDUCATION

RAJALAKSHMI ENGINEERING COLLEGE CHENNAI
B.E.Computer Science Engineering
2021-2025 CGPA: 7.15

SMT.NARBADA DEVI J.AGARWAL VIVEKANANDA VIDYALAYA SR. SECONDARY SCHOOL
HSC
2021 Percentage: 82

SKILLS

- Programming skills - Python, Flutter, React, Node.js
- Database - MySQL,mongodb
- Tools - Excel,Github, VScode
- Compliance - ISO 9001, ISO 13485, CDSCO

CERTIFICATIONS

- **ChatGPT & Generative AI:Prompt Engineering**,Udemy
- **Excel Essential Training**,Linkedin Learning
- **Introduction to IOT**,NPTEL
- **Joy of computing using python**,NPTEL

INTERNSHIP

- **Deep learning Intern**
Vcodez,Chennai.(3 months)
- **DataBase Management System Intern**
NISC,Chennai.(1 week)

PROJECTS

SMART IRRIGATION SYSTEM -IOT

Developed a smart irrigation system that utilizes IOT sensors to monitor soil moisture levels and weather conditions,optimising water usage and enhancing agriculture efficiency.Successfully reduced water consumption by 40%.The blynk mobile app interface allows for real time monitoring and control

Spectra E-Learning - Flutter, Node.js, Mysql, Github

An interactive web platform designed to enhance medical education through structured, accessible digital learning. The system provides course modules, assessments, and provide completion certificate for clinical training. Features include user authentication, progress tracking, and multimedia content delivery to support professionals. Built with a focus on usability and scalability, the platform bridges the gap between traditional learning and modern digital education.

CELLS RESPONSIBLE FOR SKIN CANCER DEVELOPMENT -RESNET50,VGG19, Python

Developed a deep learning-based skin cancer classifier using ResNet-50 and VGG19 on the HAM10000 dataset. Handled class imbalance with SMOTE and data augmentation. Built a user-friendly Python GUI (Tkinter) for real-time image input and instant predictions, making early detection accessible and efficient.

Appointment and Inventory Management - Flutter, Node.js, MySql, Google Gemini API

Designed and developed a business intelligence dashboard to monitor sales performance across regions and product categories. Utilized SQL to extract and clean data, Excel for exploratory data analysis, and Power BI to build interactive reports. Integrated DAX to create KPIs such as revenue and growth trends, helping stakeholders identify key insights and make informed business decisions.
